MUHAMMAD USMAN ANWAR

Gojra, Pakistan | +92 310 162 5477 | muhammadusmananwar50@gmail.com | github.com/Usman3660 | linkedin.com/in/muhammadusman-anwar

PROFESSIONAL SUMMARY

Software Engineer with hands-on experience in Generative AI, LLMs, and full-stack development. Proven track record designing and deploying RAG systems, LLM-powered applications, ERP-style business platforms, and scalable MERN/microservices architectures across freelance work, internships, and independent projects.

EDUCATION

Bachelor of Science in Software Engineering, FAST National University of Computer and Emerging Sciences (FAST-NUCES)
Faisalabad, Pakistan **08/2022 – 07/2026**

- Relevant coursework: Data Structures, Algorithms, Machine Learning, Software Project Management, Database Systems, OOP.

TECHNICAL SKILLS

Languages: Python, JavaScript, Java, C++, Dart, SQL
AI / ML: LLMs, RAG, LangChain, Hugging Face Transformers, NLP, Embeddings, Vector Databases, PyTorch
Web & Mobile: MERN Stack (React, Node.js, Express, MongoDB), Flutter, Firebase, Supabase, PostgreSQL, REST APIs, Microservices
Tools & Platforms: Git, GitHub, Docker, VS Code, Android Studio, MySQL, Streamlit

WORK EXPERIENCE

Freelance Software Developer **2026 – Present**
Remote

- Building Lincoz, an ERP-style project and financial operations platform, by designing 4 role-based dashboards (RBAC) on React 19 and Supabase (PostgreSQL) that tie project milestones to invoicing and payouts.
- Modeled 5 financial transaction streams with three-state payment tracking (Paid, Partially Paid, Unpaid); delivered printable statements, Excel/Google Sheets-compatible CSV exports, and an immutable audit trail.

Full Stack Development Intern, CodeAlpha **09/2026 – 10/2026**
Remote

- Completing practical full-stack assignments and projects in a one-month virtual internship, following company guidelines and delivery timelines.

Full Stack Development Intern, Progree **09/2026 – 10/2026**
Remote

- Completing hands-on full-stack projects in a one-month remote internship with mentorship, per program guidelines and team collaboration.

Teaching Assistant — Software Project Management, FAST-NUCES **01/2026 – 06/2026**
Faisalabad, Pakistan

- Supported 40+ students through lab sessions, grading, and one-on-one guidance on Agile and Scrum methodologies.
- Reduced student query resolution time by 40% by creating structured tutorial notes and reference guides.

Full Stack Developer Intern, IPS Technologies **07/2025 – 09/2025**
Remote

- Developed and integrated RESTful APIs using Node.js and Express, reducing endpoint response time by ~25% through query optimization.
- Delivered 3 production features with a 4-member team within sprint deadlines using Git and Agile workflows; wrote unit and integration tests achieving 80%+ coverage.

AI-Enhanced Web Developer Intern, Nexium **06/2025 – 08/2025**
Remote

- Built an AI-integrated web feature using n8n improving accuracy by 35%; implemented React components with Context API and JWT authentication.

PROJECTS

Lincoz — Project Management & Financial Operations Platform, React 19, Vite, Tailwind CSS 4, Supabase (PostgreSQL)

- Unified Kanban task delivery with corporate finance through a deliverable-verification workflow that gates payouts until a Project Manager signs off.
- Built a Pay-In/Pay-Out hub with printable vouchers and a finance ledger reporting invoiced amounts, collections, payroll, net cash flow, and operating margin.

Medical RAG Assistant, Python, LangChain, FAISS, Streamlit

- Engineered a RAG pipeline over trusted medical sources, achieving 90%+ answer relevance; semantic search with dense embeddings cut irrelevant retrieval by 50% vs. keyword-only baseline.

Livestock Sync — Bilingual Livestock Health Management Platform, Flutter, Firebase, Gemini API, MERN

- Developed a bilingual mobile and web app digitizing animal medical records into a cloud ledger for 200+ dairy farmers across Punjab, replacing paper-based record-keeping.
- Built a Gemini-powered diagnostic engine for real-time, localized veterinary guidance, reducing vet consultation queries by ~30%; added GPS-based discovery of nearby veterinary providers.

Kitchen AI — Recipe Generation App, PyTorch, Hugging Face, GPT-2, Streamlit

- Fine-tuned GPT-2 on a 50K+ recipe dataset; deployed at kitchen-ai.streamlit.app with real-time prompt-based generation.

Fashion Spot — E-Commerce Platform, React, Node.js, MongoDB, Redis

- Architected a microservices backend with JWT auth and Redis caching, improving API throughput by 40% under load testing.

CERTIFICATIONS & TRAINING

ML Summer School, Cohere Labs **07/2025**

- Completed intensive training in large language models, fine-tuning, embeddings, and production ML systems.
